

## *How to care for sewing threads?*

### *Product storage*

- Store your sewing threads in a place that is protected from permanent exposure to: light (both natural or artificial), heaters and humidity.

### *Recommendations for washing fabric and clothing:*

The following are general recommendations for most fabrics, clothing and textile accessories. In the case of fabric that has special recommendations, you must follow the manufacturer's instructions.

- Handwash or wash in a washing machine, according to the instructions for each kind of fabric and material.
- Use soap or detergent for white or colored fabrics, depending on what you are washing. Always wash with similar colors and avoid whitening detergents when washing colored clothing.
- Don't leave clothes soaking for more than 30 minutes, this will not improve the results of your washing.
- Always rinse with plenty of cold water.
- Don't wring out fabric by twisting it, this can damage your clothing.
- Dry clean only when the manufacturer's instructions say so, some materials should not be dry cleaned.

### *Recommendations for ironing fabric and clothing:*

- Iron with the temperature that is recommended for each material. This information can be found on the manufacturing label of each product.
- Always iron clothes inside out.
- Only use steam ironing for the materials indicated on the iron.
